This user-friendly book provides a step-by-step guide to using the five major approaches to research design: quantitative, qualitative, mixed methods, arts-based, and community-based participatory research. Chapters on each approach follow a unique format—they present a template for a research proposal and explain in detail how to conceptualize and fill in every section. Terminology commonly used within each approach is identified, and key moments of ethical decision making are flagged. Interdisciplinary research examples draw on current events and social justice topics. Unique coverage includes hot topics: replication studies and data sharing, tailoring proposals to different audiences, and more. The book also includes a general introduction to social research; an in-depth, practical discussion of ethics; and a chapter on how to begin a research study, from planning a topic to developing a research question via a literature review. □ Pedagogical Features *Multiple “Review Stops” in each chapter—quick quizzes with answer keys. *End-of-chapter writing exercises, research activities, and suggested resources. *Bold-face key terms and an end-of-book glossary. *Boxed tips from experts in the respective approaches. *Supplemental PowerPoint slides for instructors using the book in a class.□ □

After the highly successful launch of this popular, college-level intermediate French program, the Second Edition of Réseau: Communication, Intégration, Intersections expands upon the features that have made it so popular in two- and four-year colleges and universities around the world. Réseau conceives of the teaching of French as a holistic endeavor, not only in terms of language skills—speaking, listening, reading, and writing—but also in terms of cultural knowledge in the broadest sense. Based on the belief that knowledge of a second language and culture necessarily brings about a greater understanding not only of the world in an increasingly global context, but also of the individual self, the content and activities in Réseau offer students the opportunity to reflect on the differences between their own and French and Francophone cultures and experiment with the new identities that so many researchers suggest language learning can encourage.
