1.1 What is the Extended Project qualification? The Extended Project is a Level 3 qualification equivalent to half an A Level (50%), therefore worth more in UCAS points than an AS Level qualification. Therefore, the Extended Project Qualification is a valuable consideration instead of undertaking a fourth AS subject to boost UCAS point s.

The Extended Project Qualification (EPQ) is a nationally recognised qualification at Level 3, carrying up to 18 performance table points and 28 UCAS points. The EPQ is a single piece of work that requires a high degree of planning, preparation, research and autonomous working. It can be completed as either a 5,000 word dissertation, an artefact or performance accompanied by a 1,000 word report.

[Extended Project Qualification Level 3 - ASDAN](#)
The Extended Project Qualification (EPQ) is a level 3 (A-level standard) qualification offered by AQA, Edexcel, OCR and WJEC. It involves choosing a topic, carrying out research, then creating EITHER a 5,000 word report OR a 'product' + a 1,000 word report. After that you must deliver a small 10-15 minute presentation to a group of non-specialists about your topic.

REPORT ON THE EXAMINATION – LEVEL 3 EXTENDED PROJECT QUALIFICATION – 7993 – NOVEMBER 2017 with no clear indication of what the new individual AO marks should be. In other centres, there was a lack of clarity over which was the final agreed mark.

This volume contains technical papers and panel position papers selected from the proceedings of the International Symposium on Information Systems and Technologies for Network Society, held together with the IPSJ (information processing society of Japan) National Convention, in September 1997. Papers were submitted from all over the world, especially from Japan, Korea and China. Since these countries are believed to form one of the major computer manufacturing centers in the world, a panel on " Computer Science Education for the 21st Century " was set up. A special session on the Japanese project on Software Engineering invited representative researchers from the project, which is supported by the Ministry of Education, Japan.

Thinking about a career in property or construction? Thinking of becoming of Chartered Surveyor? How to Become a Chartered Surveyor demystifies the process and provides a clear road map for candidates to follow. It will also be of relevance to academic institutions, employers, school leavers, apprentices, senior professionals, APC Counsellors/Supervisors and careers advisors.

"TRB's National Cooperative Highway Research Program (NCHRP) Report 709: Investigation of Short-Term Laboratory Aging of Neat and Modified Asphalt Binders provides a proposed method of testing for short-term laboratory aging of neat and modified asphalt binders using the modified German rotating flask as an alternative to the rolling thin film oven test. The following appendixes A-E to NCHRP Report 709 are only available in electronic format."--

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Burkholderia pseudomallei and B. mallei, causes melioidosis and glanders, respectively, which are two endemic infectious diseases in many parts of the world. The recent reports of glanders outbreaks in horses in Pakistan and Bahrain and the increasing incidence of human melioidosis in Thailand and other tropical regions have resulted in increased research efforts to prevent these diseases. Moreover, both B. mallei and B. pseudomallei exhibit an intriguing intracellular life cycle including the induction of actin tail formation and cell fusion and thereby have developed as model organisms in infection biology. This Research Topic summarizes recent progress to understand these pathogens at the molecular level, with emphasis in their virulence traits, host pathogen interactions, population structure and potential targets for therapeutic intervention and vaccine development.
