Research For Evidence Based

Although the purposes of nursing research (conducting research to generate new knowledge) and evidence-based nursing practice (utilizing best evidence as basis of nursing practice) seem quite different, an increasing number of research studies have been conducted with the goal of translating evidence effectively into practice. Clearly, evidence from research (effective innovation) must be accompanied by effective implementation, and an enabling

Real-World Practitioners of nursing research and help bridge the gaps among clinical research, academia, and clinical practice. All-star group of contributors represents a widely respected team of experts in nursing research and evidence-based practice.

Nursing Research - 9th Edition
Evidence-based practice (EBP) is the process of collecting, processing, and implementing research findings to improve clinical practice, the work environment, or patient outcomes. According to the American Nurses Association (ANA), nursing interventions should be practical, methodical decisions based on EBP research studies.
