Most of the papers reproduced here have either been presented at a national or international conference, and some have been published elsewhere. I have obtained permission to republish because I think it is important to have them all together. The idea came to me when I was asked, during an interview, why I wrote on such different topics as part of my scholarship. The question was based on the different publications in which the person asking had found them. I had to explain that they are all on language and culture, two areas that are closely interrelated. It occurred to me that having all the papers published in one volume would help show how they relate to one another, and thereby provide a more meaningful dialogue on the general topic. I therefore hope that although each paper stands alone, use of cross-referencing will provide a cumulative effect that is impossible when the papers are read as separate publications. The last chapter is not a paper in the traditional sense, in that it is just a list of words. However, it adds to the readers understanding of the Kikuyu language. The semantic domains are a people groups way of understanding, categorizing and labeling the world around them. I hope it will be especially important as a source for future scholars who will want to analyze the culture and thought processes of their ancestors.

2007 Choice Outstanding Academic Title At the funeral of Matthew Shepard—the young Wyoming man brutally murdered for being gay—the Reverend Fred Phelps led his parishioners in protest, displaying signs with slogans like " Matt Shepard rots in Hell, " " Fags Die God Laughs, " and " God Hates Fags. " In counter-protest, activists launched an " angel action, " dressing in angel costumes, with seven-foot high wings, and creating a visible barrier so one would not have to see the hateful signs. Though long thought of as one of the most virulently anti-gay genres of contemporary American politics and culture, in God Hates Fags, Michael Cobb maintains that religious discourses have curiously figured as the most potent and pervasive forms of queer expression and activism throughout the twentieth century. Cobb focuses on how queers have assumed religious rhetoric strategically to respond to the violence done against them, alternating close readings of writings by James Baldwin, Tennessee Williams, Jean Toomer, Dorothy Allison, and Stephen Crane with critical legal and political analyses of Supreme Court Cases and anti-gay legislation. He also pays deep attention to the political strategies, public declarations, websites, interviews, and other media made by key religious right organizations that have mounted the most successful regulations and condemnations of homosexuality.
