There are three basic parts to a lab report: pre-lab, in-lab, and post-lab. In this document, I've written some helpful tips that might help you through your lab-report woes. I won't include everything you have to do (you should look on VOH for the report guidelines), but just a few key ideas.

Tips on Writing Lab Reports—University of California...
In order to help students frame the lab experiment, consider the main question your students should become able to answer: What question is this lab experiment answering? How will your data answer this question? How will you collect this data? How will you minimize ambiguity and control variables? Here are some of the topics you might ask your students to think about in a pre-lab exercise: concepts, theory, and models
