During the crucial period of 1917-1918, the United States superseded Great Britain as the premier power in the world. The differing strategic perspectives of London and Washington were central to the tensions and misunderstandings that separated the two dominant powers in 1918 and determined how these two countries would interact following the Armistice. David R. Woodward traces the projection of American military power to western Europe and analyzes in depth the strategic goals of the American political and military leadership in this first comprehensive study of Anglo-American relations in the land war in Europe. Based on extensive research in British and American archives, the study focuses on Woodrow Wilson and David Lloyd George, whose relationship was poisoned by the mutual suspicion and hostility generated by their disagreements over strategy and military policy. President Wilson sought to use his country's military effort in western Europe as a tool to gain acceptance for his "new diplomacy." The British, anxious over the Turko-German threat to Asia and their worsening manpower situation, sought to utilize American military intervention for their own political/military purposes. Woodward's use of unpublished sources provides new perspectives on war leadership, and his analysis of the British-American interaction serves as a case study of the inevitable tension between national self-interest and efforts at collective security, even among nations that share many cultural and political values. For historians and anyone interested in military history and World War I, Trial by Friendship fills a gap in the study of Anglo-American relations by providing a strong, well-written study on an area of American history that has received scant attention from scholars.

During World War II, polio epidemics in the United States were viewed as the country's "other war at home": they could be neither predicted nor contained, and paralyzed patients faced disability in a world unfriendly to the disabled. These realities were exacerbated by the medical community's enforced orthodoxy in treating the disease, treatments that generally consisted of ineffective therapies. Polio Wars is the story of Sister Elizabeth Kenny -- "Sister" being a reference to her status as a senior nurse, not a religious designation -- who arrived in the US from Australia in 1940 espousing an unorthodox approach to the treatment of polio. Kenny approached the disease as a non-neurological affliction, championing such novel therapies as hot packs and muscle exercises in place of splinting, surgery, and immobilization. Her care embodied a different style of clinical practice, one of optimistic, patient-centered treatments that gave hope to desperate patients and families. The Kenny method, initially dismissed by the US medical establishment, gained overwhelming support over the ensuing decade, including the endorsement of the National Foundation for Infantile Paralysis (today's March of Dimes), America's largest disease philanthropy. By 1952, a Gallup Poll identified Sister Kenny as most admired woman in America, and she went on to serve as an expert witness at Congressional hearings on scientific research, a foundation director, and the subject of a Hollywood film. Kenny breached professional and social mores, crafting a public persona that blended Florence Nightingale and Marie Curie. By the 1980s, following the discovery of the Salk and Sabin vaccines and the March of Dimes' withdrawal from polio research, most Americans had forgotten polio, its therapies, and Sister Kenny. In examining this historical arc and the public's process of forgetting, Naomi Rogers presents Kenny as someone worth remembering. Polio Wars recalls both the passion and the practices of clinical care and explores them in their own terms.
