INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." – Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates "Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S. President Barack Obama **Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts.** When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

If you're even considering entering the teaching profession you need to stop and read this factual account before you take another step. The reality is that teachers are overworked, overstressed, and underpaid yet they take on the phenomenal task of educating the future leaders of society. Teachers should be applauded for their valiant efforts, but instead they often feel defeated and isolated. With a lack of resources, materials, and technology teachers often feel unsupported as they scramble to meet the needs of students. Teachers are under an enormous amount of pressure, while they are continually subjected to disrespectful and malicious behavior from troubled students. The public school system has many defects, but up until now they have been well-kept, dirty little secrets. The Special Education program is riddled with severe inadequacies. All schools are vulnerable to inappropriate behavior, but parents will be shocked to learn about the epidemic of sex, drugs, and violence on school campuses. Find out what school districts don't want you to know. Explore the world of education from a teacher's perspective.

Learning from your mistakes makes you smart. Learning from other people's mistakes makes you a genius. There are two ways to share knowledge, you can push information out or you can pull them in with story. A good story well told, can change the world. After 25 years in the trenches working with thousands of individuals and small business owners, John MacGregor opens the vault on 10 incredible stories that have the power to transform your financial life forever. In this book MacGregor reveals 10 real-life stories of people he encountered who had everything and lost it all. It is here, MacGregor reveals for the first time "The B.E.A.R Trap", THE four underlying reasons why so many people go and stay broke. Using jaw dropping stories, this book answers and solves why: " 78% of people are living paycheck to paycheck" 65% of people could not come up with \$400 today for an emergency expense" Why money is the #1 source of stress in our society" AND, why this problem is getting worse - not better - despite the thousands of how-to-books, DVD, and online resources available. Unlike the thousands of traditional "how-to" personal finance books that use traditional methods that rarely elicit change in people, these stories elicit something deep within the reader that allows people to make meaningful transformations in their life. The BEAR Trap formula is not only effective in your financial decision making, you can use it anywhere in your life to avoid painful outcomes and pitfalls. Though this is about the rich going broke, the amount of money doesn't matter as everyone of these stories can pertain to you and your family
